

RF Coaxial Attenuator

- ✓ Optional Power: 0.5W-10KW
- ✓ Optional frequency range: DC-40GHz
- ✓ Flatness Attenuation Value and Accuracy
- ✓ Anti-pulse strong anti-burnout ability
- ✓ High reliability and good repeatability

Description

Coaxial fixed attenuators are used in absorbing energy of transmission line, expanding power range and controlling power level, they are also used in accurately measuring power or spectrum of RF microwave transmitters accompany with small power meter, comprehensive tester or spectrum analyzer.

HXTS serial coaxial fixed attenuators feature wide frequency band, low VSWR, flatness attenuation value, excellent capacity in anti-pulse and anti-burnout etc.

In this section, you can find the coaxial attenuators with individual data sheets containing product description, specifications and outline drawings by a quick reference guide.
